PROFESSIONAL EXPERIENCE

Frontend Developer

Accenture — Pune, India

June 2022 – Present

Key Responsibilities:

- Designed and developed dynamic, responsive web UIs using **React.js** and **Tailwind CSS**.
 - Integrated third-party APIs and backend services using **RESTful APIs**.
 - Implemented best practices for performance optimization and accessibility.
 - Worked with UI/UX teams to convert Figma/Adobe XD designs into functional web pages.
 - Participated in Agile ceremonies, peer code reviews, and sprint planning.
 - Ensured cross-browser and device compatibility across major platforms.
-

PROJECTS

1. Online Learning Management System (LMS)

Client: Leading Global EdTech Company

Company: Accenture

Duration: July 2023 – December 2023

Project Overview:

A cloud-based platform for hosting video courses, student progress tracking, and certifications.

Responsibilities:

- Developed responsive course listing, dashboard, and video player interfaces.
- Implemented role-based authentication and user management using JWT.
- Integrated REST APIs for course data and user progress tracking.

- Deployed the application on **Vercel** for staging and production.

Tech Stack: React.js, Tailwind CSS, Node.js, PostgreSQL, Prisma, Vercel

2. Inventory Management Dashboard

Client: Multinational Retail Chain

Company: Accenture

Duration: January 2024 – Present

Project Overview:

Real-time inventory dashboard for managing stock, warehouse data, and analytics.

Responsibilities:

- Built dashboard modules with filters, sorting, and dynamic charts.
- Used **WebSockets** for real-time data sync and updates.
- Integrated backend APIs for CRUD operations.
- Focused on optimizing UI performance and improving loading time.

Tech Stack: React.js, Tailwind CSS, Node.js, MongoDB, Prisma, Netlify
